

AXA INSURANCE AGENCY for AIR SPORTS
6345 Kössen/ Austria

Dear friends and pilots,

The northern flying season is on our doorsteps and many hang gliding, paragliding and skydiving comps and trips are scheduled for the upcoming year. Thorough preparations for a happy northern flying summer also include precautions for personal safety and security. And this also includes correct and sufficient insurance coverage. Strict liability regulations and legal requirements for insurance coverage for air sports are in force in most countries in the world - especially throughout Europe.

Today I would like to remind about our special AXA Insurance Service for Air Sports in Koessen/Austria.

- We are based in Austria and licensed according to **EU Insurance Distribution Directive** to operate in all EU member countries. Behalf of **AXA Versicherung AG** we provide 3rd party liability insurance for hang gliding, paragliding, paramotoring and parachuting **to all EU citizens/residents**, offering world wide coverage (except US)
- We also may provide this coverage for **none EU citizens/residents** while flying in EU territory (and Switzerland) and even extended to all FAI/CIVL sanctioned competitions world wide (except US)!
- We have combined **AXA 3rd party liability insurance** with **emergency rescue coverage** (two options) to serve the needs of today's expensive search and rescue operations by helicopter in case of an accident/incident. We are licensed to provide
- For EU pilots we also offer a **pilot accident insurance** focusing invalidity, but optional also some accident and repatriation costs can be covered.

For your convenience we also issue English versions of policies and send documents also by Email. In case of an accident/incident we are the communicator and coordinator in your case and will look after proper conduct of your interests.

As you might know I am myself since almost 50 years in air sport business - as a former skydiver, an early pioneer of hang gliding and than of paragliding and serving for long years to FAI/CIVL.
